## Connect Jr

The children in Early Learning School are working on different projects according to the interests of each group:

- **Mont A** is building a tree for the big bad wolf they have seen hiding behind the trees near the cafeteria. They have picked up many leaves that have been classified according to their shape, to paste them on the tree.
- **Mont B1** is focusing on giraffes. They are learning about their different characteristics, such as patterns on the skin, habitat, what they eat, etc.
- **Mont B2** has shown an interest in the history and ways of living of the dinosaurs, and are using clay to recreate their habitat.
- **Mont C** is interested in building a city. They have been learning about how cities are built and have started to design the layout of the different parts of the city they want to build, with the help of wood blocks and boxes.
- **Mont D** has started to make the femur of a Brachiosaurus, to then compare it to the size of a human femur.
